RELEVANT SKILLS

- HTML/CSS/JavaScript
- React.js/React-router
- Angular 2 (currently learning)
- D3.js
- Detail-oriented programming
- Version Control (GitHub)
- Adobe Products
- Figma/Prototyping Tools

EDUCATION

MAY 2020 (GRADUATED)

High-School Diploma, Mt. Vernon High School

Participated in Varsity Cross Country and Track.

CURRENT (SOPHOMORE)

Media Arts & Science, Indiana-University Purdue-University Indianapolis (IUPUI)

Relevant Coursework: Intermediate Media App Development, Digital Media Imagery, Human Computer Interaction

PROJECT EXPERIENCE

INTERMEDIATE MEDIA APP DEV. (N320)

Aphex Twin Project

For the final project in my N320 course, we were tasked with making a React Web-App that fetches a JSON file, to present that data in some sort of visual manner. This was my first time using fetching JSON data in a serious manner, but I eventually got used to working with it.

PERSONAL PROJECT

Landing Page

I decided I wanted to attempt to recreate one of these link trees, so I made a very simple version using HTML and CSS. Later I decided to create a background animation using [p5.js](#).

PERSONAL PROJECT

Portfolio

As I started to ready myself for applying to internships, I decided to build a portfolio website that contains a list of my projects, as well as an "About me" section and a "Resume" tab. I decided to make this using React, in addition to using the [React-Router package](#) for the first time.

JOB EXPERIENCE

MARCH 2021 – AUGUST 2021

Customer Service Rep, AutoZone Auto Parts

Assisting customers with vehicular issues (such as replacing batteries, headlights, wipers, etc.), as well as assisting with purchases.

AUGUST 2021 – PRESENT

Receiving worker, Meijer Grocery Stores

Unloading trucks that contain general/grocery merchandise and organizing it on the main floor.

ACTIVITIES

Since starting college, my hobbies have changed drastically due to my interest in Front-End Development. Most of my time is spent either working on small personal projects, researching new technologies, or watching videos about CSS/JavaScript. For exercise I run and bike, usually long-distances.
